Section: 1 TEC2 CCM Programming Instructions

1.1 Using MPLAB IDE Software and MPLAB ICD3 Download Probe

Figure 1. Programming LDM in a Bare Board Setup

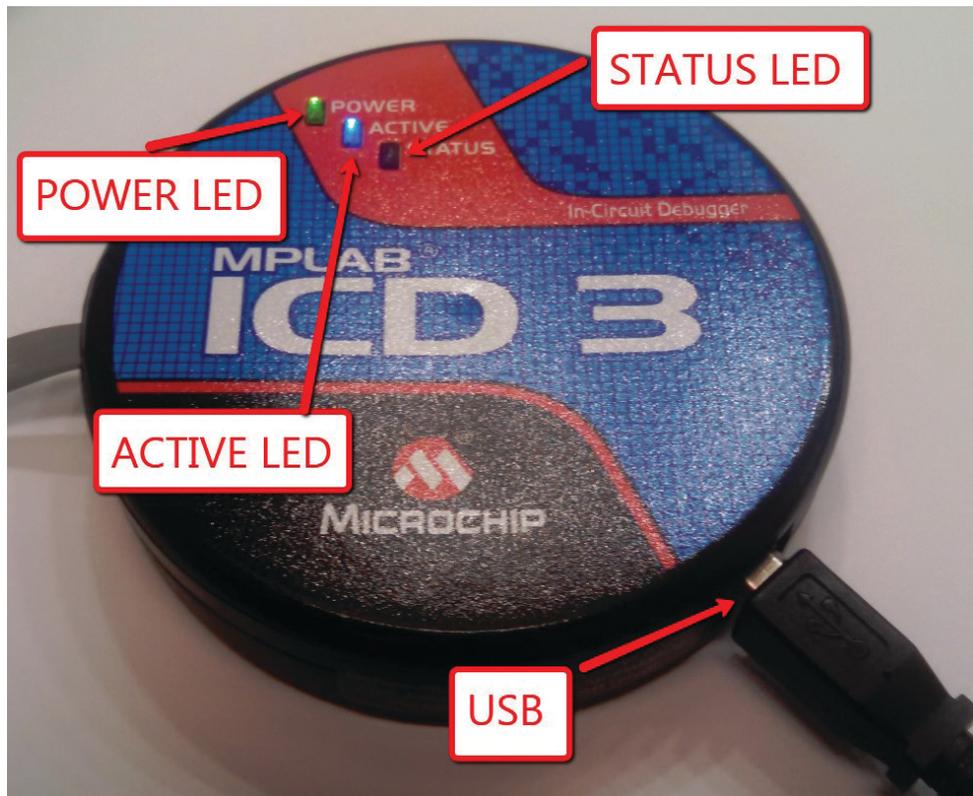

1. Connect the ICD3 probe box and USB cable to the computer.

Figure 2. USB Cable Connected to Computer

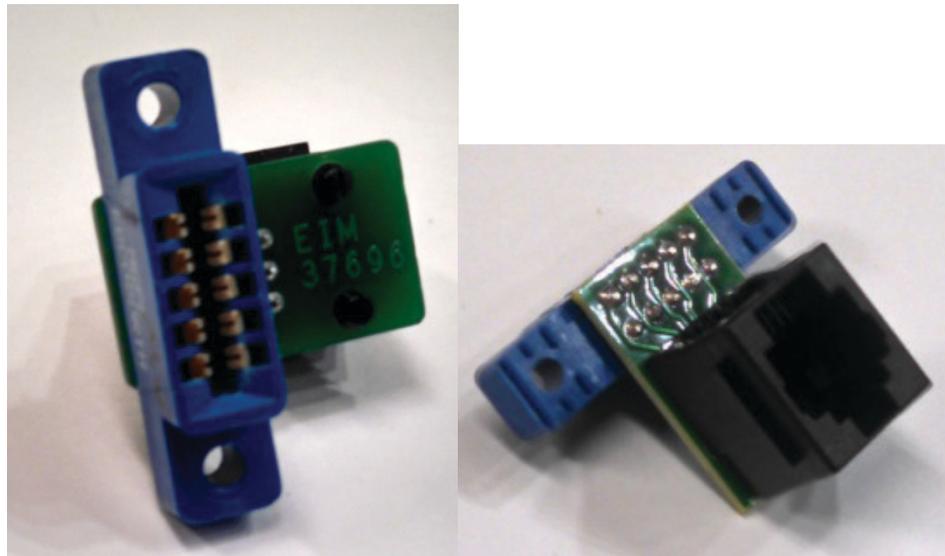

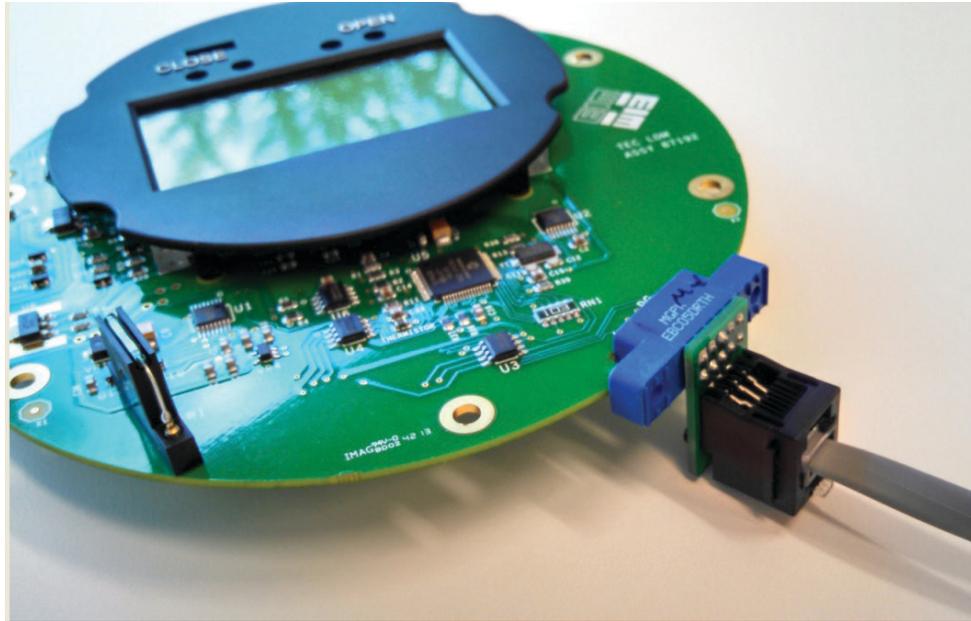

2. Connect the ICD3 probe box to the USB cable.

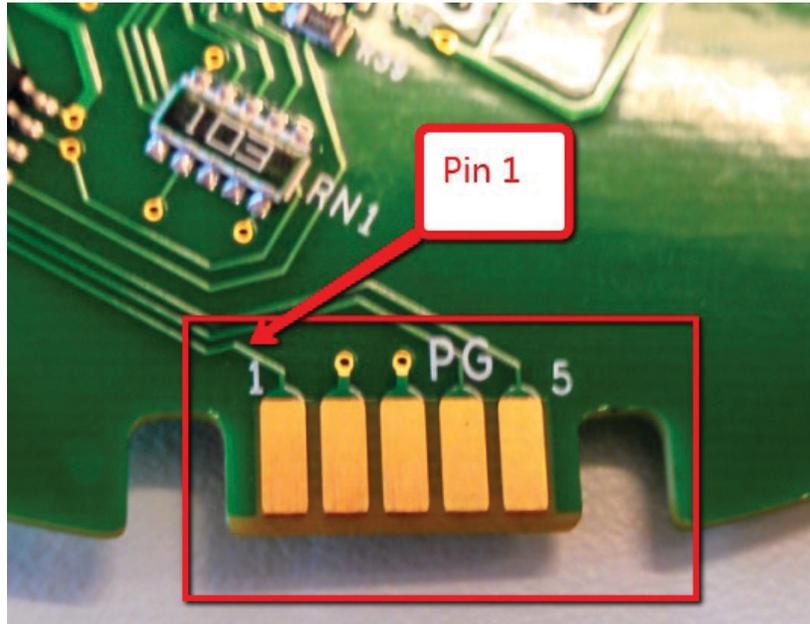

Figure 3. POWER LED should light when USB Cable is connected to PC and Probe

3. Connect the Programming Adapter Connector to the LDM board. Note the Orientation of the Connector. Programming adapter is Bettis 37696.

Figure 4. LDM ready to program with correct orientation of programming adapter

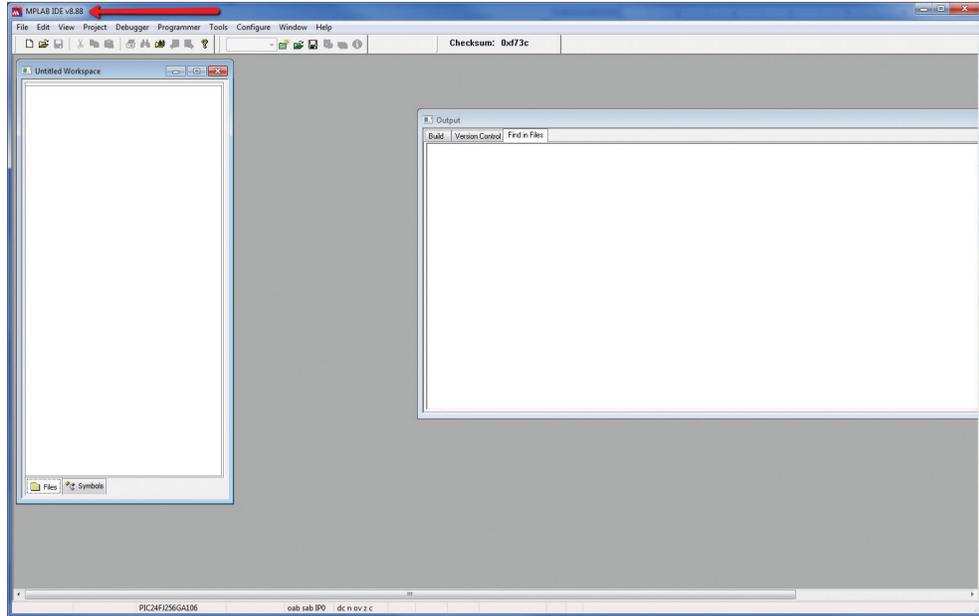

-
4. On computer, run the MPLAB software by doubling clicking the icon.
-

Figure 5. Programming Header on LDM Board

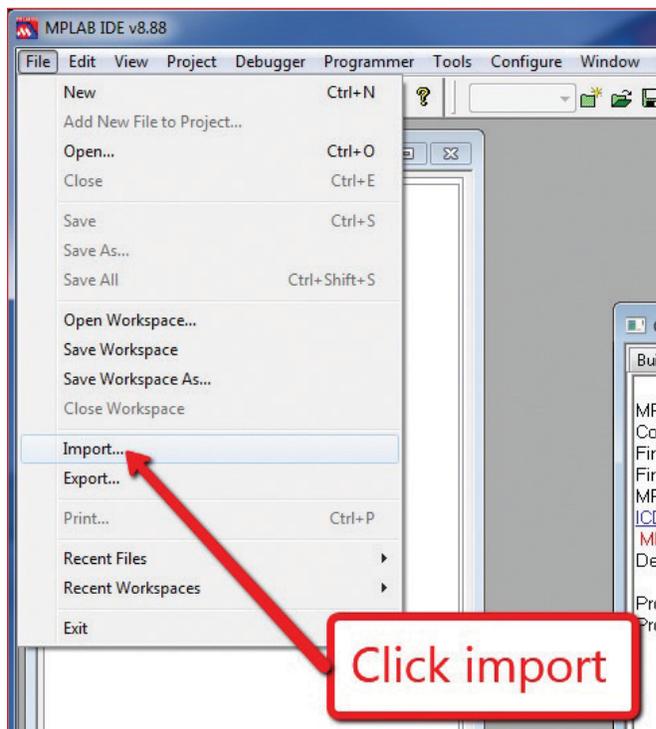

5. ICD 3 Software should start running.

Figure 6. Windows Desktop MPLAB IDE Icon

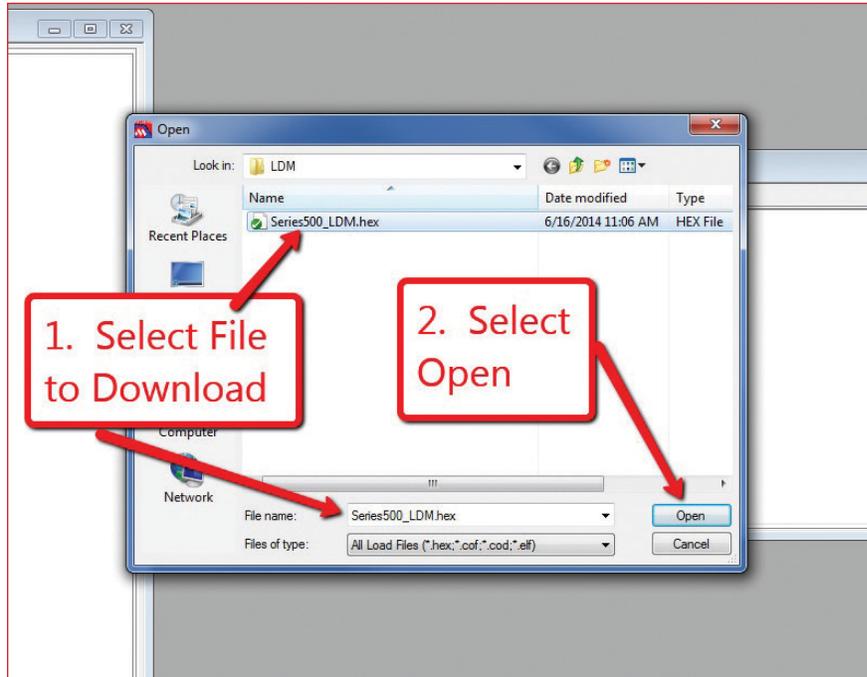

6. Click File Import.

Figure 7.

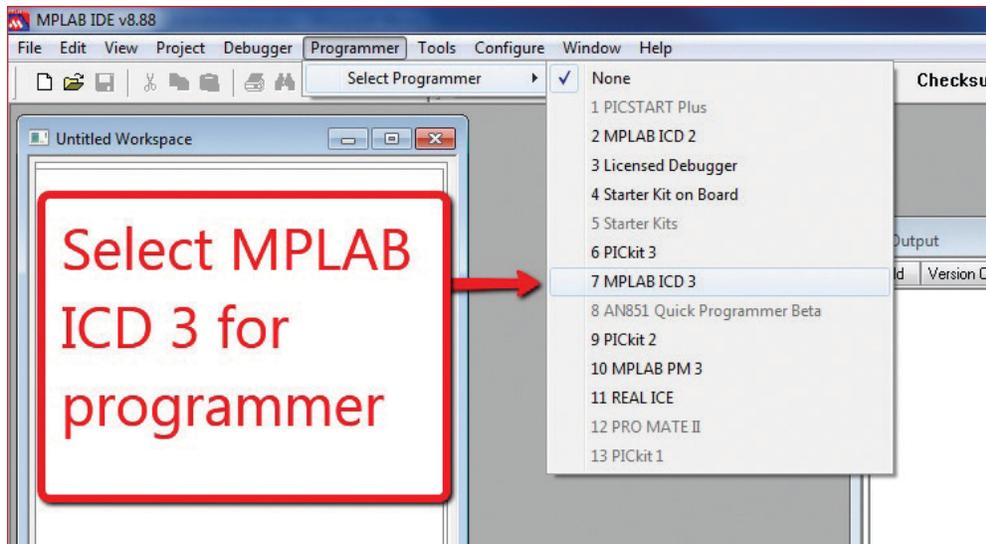

7. Pick file to download. Then click Open.

Figure 8.

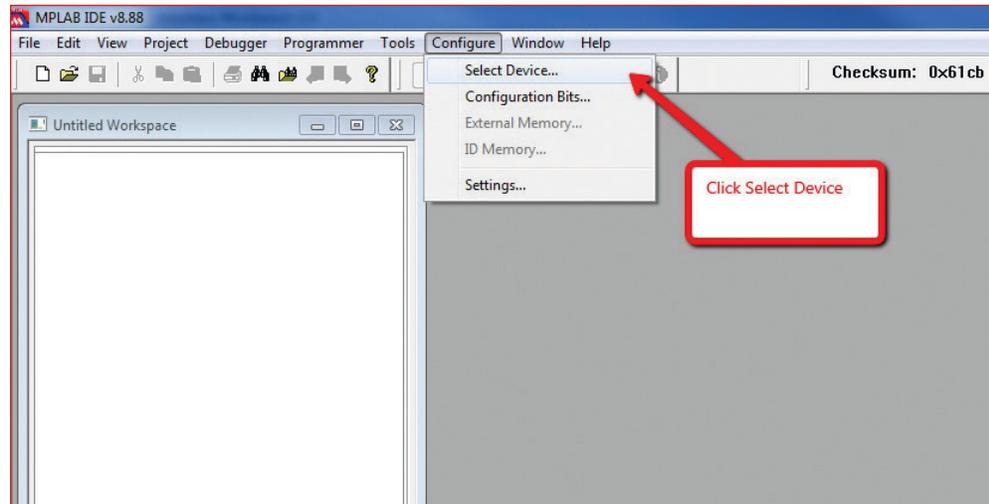

8. Select MPLAB ICD 3 for Programmer.

Figure 9.

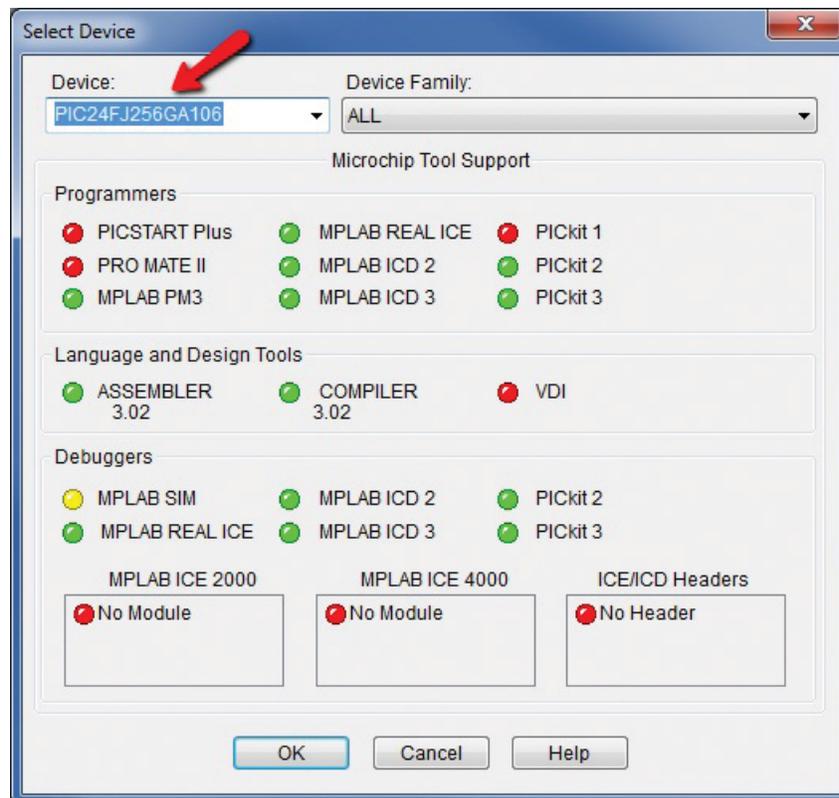

9. Click on Configure and then click on Select Device.

Figure 10.

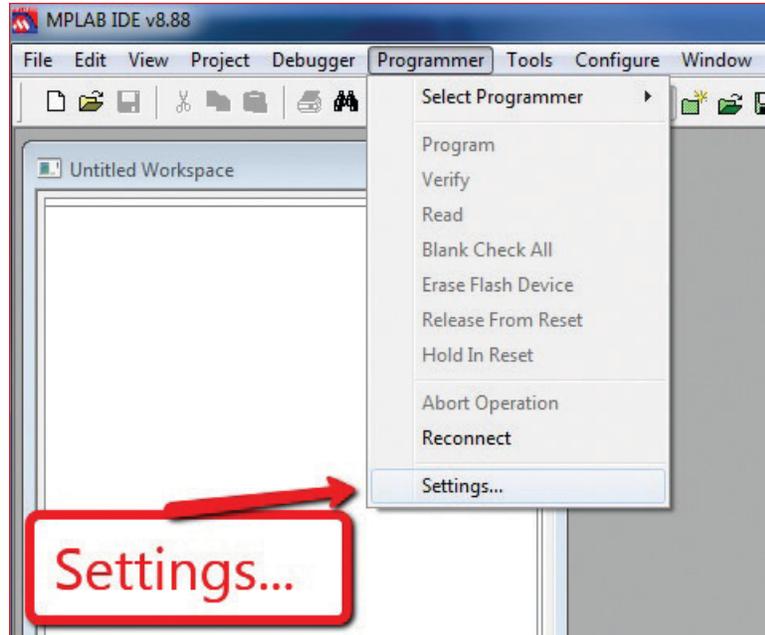

10. On the Select Device Screen, enter PIC24FJ256GA106 for the Device.

Figure 11.

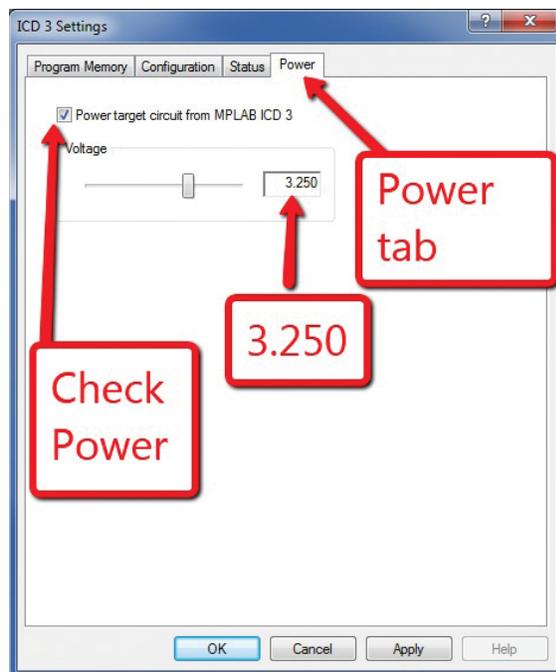

11. Click on the Programmer Settings.

Figure 12.

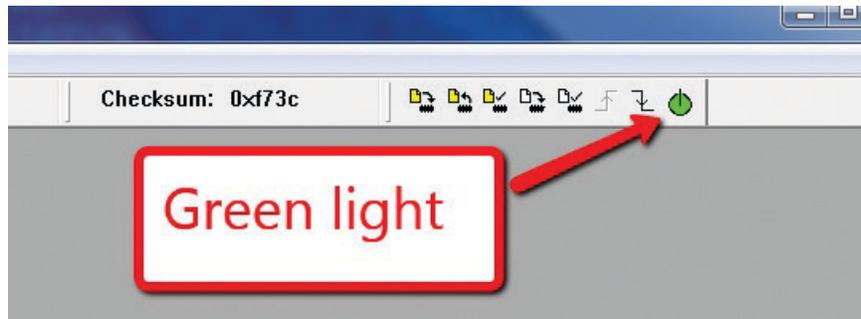

12. Click on the Power tab. Enable the Check Mark on “Power target circuit from MPLAB ICD 3”. Make sure power is set to 3.250V. Click OK.

Figure 13.

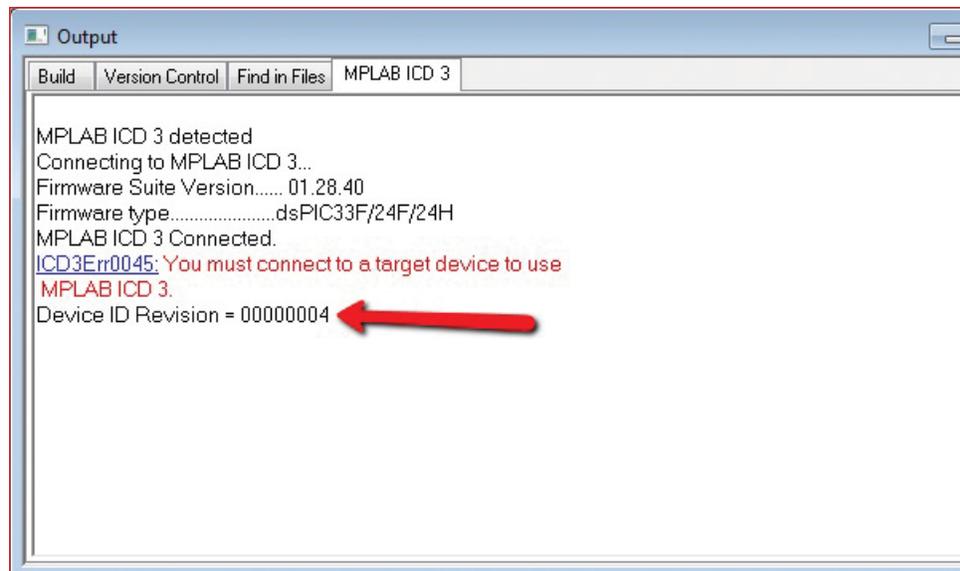

13. Green Light will come on.

Figure 14.

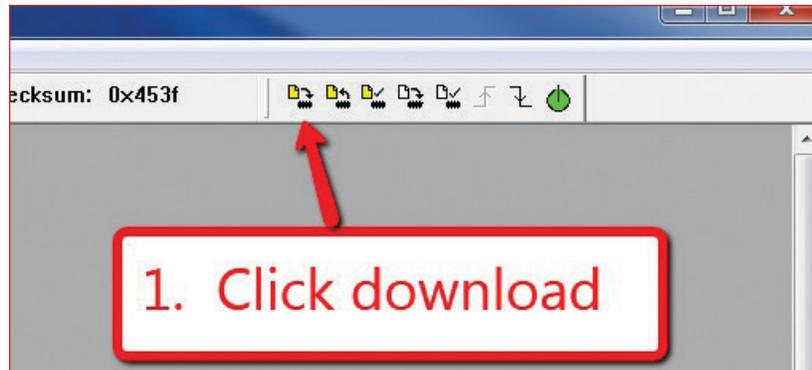

14. Output Window will show a Device ID Revision and board should be powered up.

Figure 15.

15. Click download button.

Figure 16.

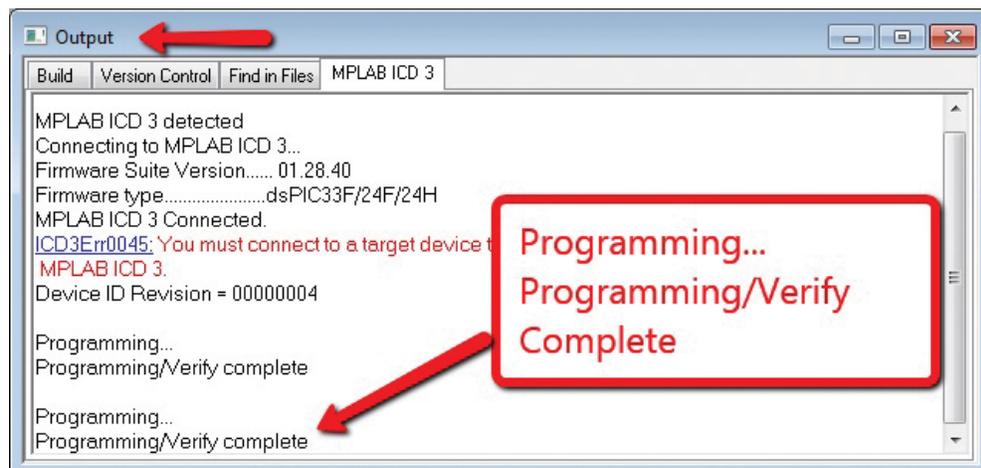

16. You should see the status indication in the bottom left of the ICD 3 window.

Figure 17.

17. Verify that Programming/Verify complete shows in the Output window.

Figure 18.

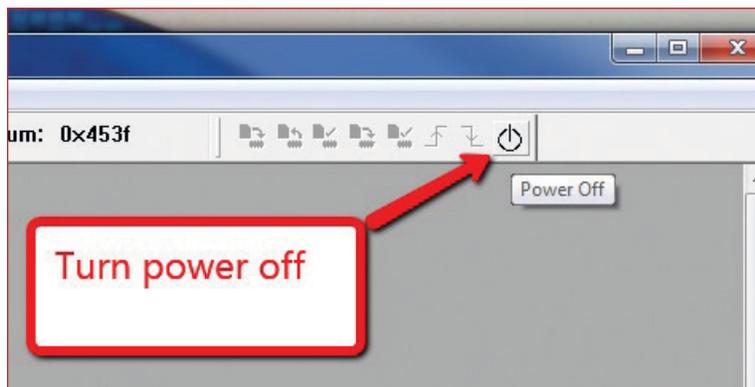

18. The display should now show information on the screen.

Figure 19.

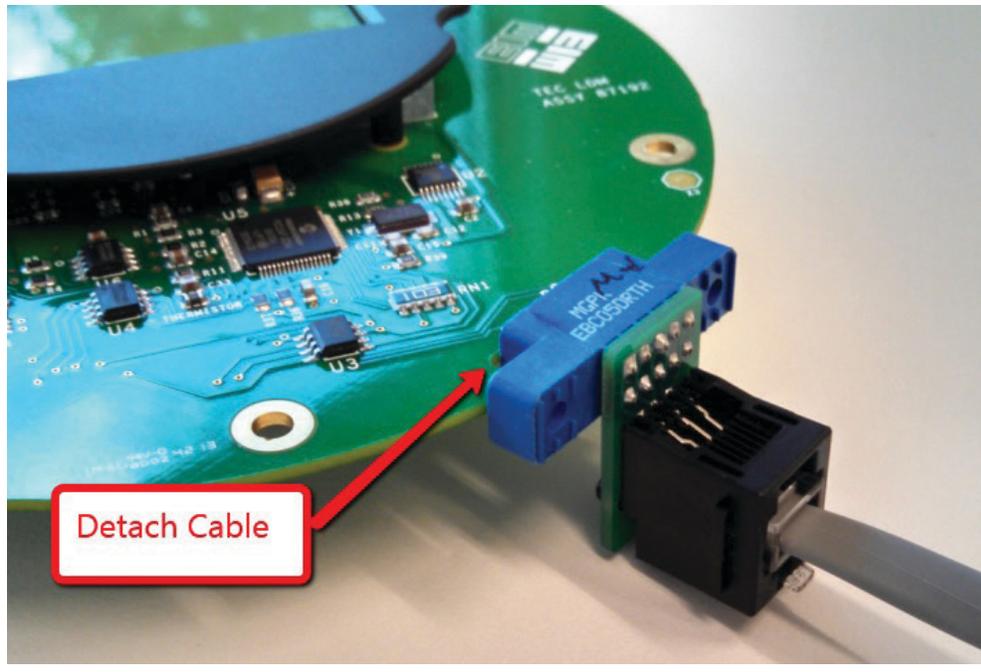

19. Click on the Power button to turn the power off.

Figure 20.

20. Click on the Power button to turn the power off.

Figure 21.

21. Congratulations, the board is now programmed and is ready for use.

Programming More Boards:

To program more board(s), keep everything the same as above, and then repeat these four instructions below:

22. Connect the Programming Adaptor and cable to the new board to be programmed (See Figure 4).
23. Click on the Power button. (See Figure 21).
24. Click on the Download button. (See Figure 17).
25. Read status in output window. (See Figure 19).

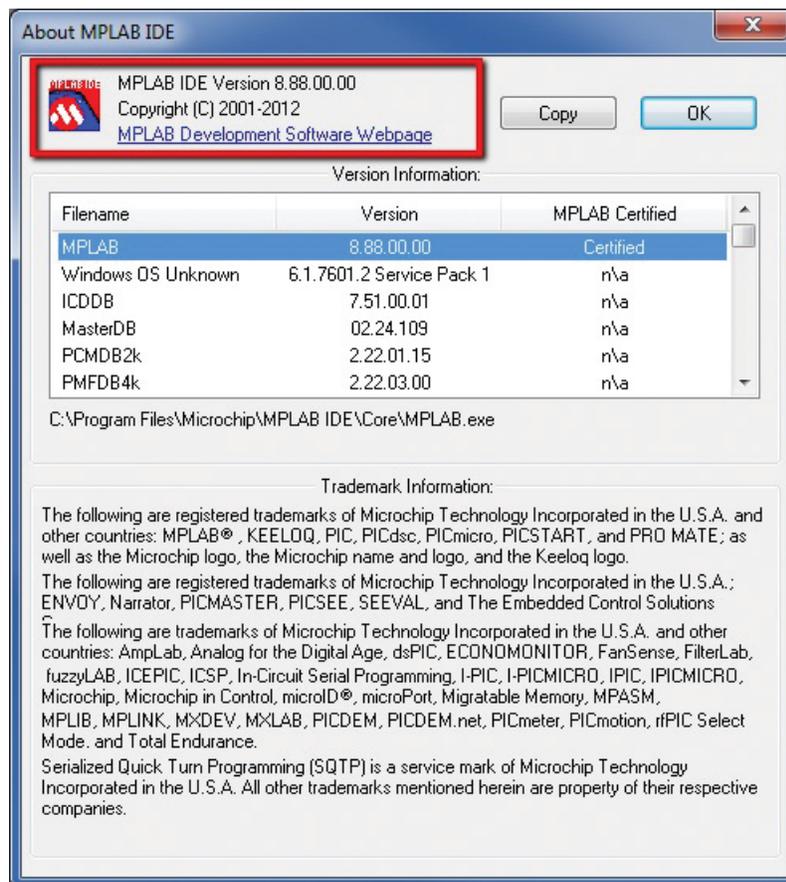

1.2 Appendix

These instructions were written for MPLAB IDE Version 8.88.00.00.
