	INTERNATIONAL ELECTR IEC Certification System for rules and details of the IEC			
Certificate No.:	IECEx BAS 11.0023X	Page 1 of 4		Certificate history:
Status:	Current	Issue No: 4		Issue 3 (2021-06-22) Issue 2 (2020-07-14)
Date of Issue:	2022-06-14			lssue 1 (2014-04-10) lssue 0 (2011-12-12)
Applicant:	Topworx Incorporated 3300 Fern Valley Road Louisville Kentucky 40213 United States of America			
Equipment:	D2-FF Valvetop Switchbox			
Optional accessory:				
Type of Protection:	Increased safety "ec", Type of protection "n	C" and Dust Protection by En	closure	
Marking:	Ex ec nC IIC T6 Gc (-20°C ≤ Ta ≤ +50°C) Ex tc IIIC T80°C Dc IP67 (-20°C ≤ Ta ≤ +50°C)			
Approved for issue or Certification Body:	behalf of the IECEx	Mr R S Sinclair		
Position:		Technical Manager		
Signature: (for printed version)		RSS-lmi		
Date: (for printed version)		<u>14/6/2022</u>

IECEx Certificate of Conformity

Certificate No .: **IECEx BAS 11.0023X**

Date of issue:

Page 3 of 4

Issue No: 4

EQUIPMENT:

Equipment and systems covered by this Certificate are as follows:

2022-06-14

The D2-FF Valvetop Switchbox is designed to control and provide feedback of the position of an actuator / valve combination located in the hazardous area via a Foundation Fieldbus or FISCO network.

The equipment comprises an enclosure either made of stainless Steel (DXS models), coated aluminium (DXP models) or glass fibre reinforced resin enclosure (DXR models) housing a FF CC Electronic Unit, up to two certified piezoelectric pilot valves and up to two limit switches. A shaft assembly passes through the enclosure base to which a disc with metallic contacts is fitted to activate limit switches fitted around the shaft. Based on the inputs from the devices fitted, the FF CC Electronic Unit processed the information and communicates it via the Fieldbus network. The FF CC Electronic Unit also controls the operation of the pilot valves, when fitted, which are connected to the pneumatic valves attached to the side of the enclosure.

On top of the Switchbox enclosure a visual indicator is fitted which mechanically connects to the shaft assembly inside to provide an indication of the position of the actuator / valve to which the equipment is connected.

External connections to the equipment are made using a plug and socket connector with screw terminals via one of two threaded entries on either side of the enclosure. The installation of external connections and the plugging of the unused entry must be carried out using appropriate Ex e or Ex n cable glands or blanking plug components with a minimum IP rating of IP67 certified by an approved certification body.

See Certificate Annex for model range & input parameters.

SPECIFIC CONDITIONS OF USE: YES as shown below:

1. When fitted, only non-combustible fluids may be used in the pneumatic circuit.

2. DXR Models Only: The equipment shall only be installed in a location where there is a low risk of mechanical damage. The enclosure constitutes a potential electrostatic risk and must only be cleaned with a damp cloth.

IECEx Certificate of Conformity

Issue No: 4

DETAILS OF CERTIFICATE CHANGES (for issues 1 and above)

Variation 4.1

Date of issue:

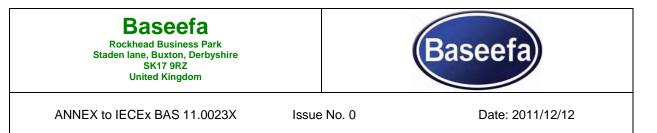

To permit update of assessment standards to IEC 60079-0:2017 Edition 7, IEC 60079-15:2017 Edition 5.0 and IEC 60079-31:2013 Edition 2. To assess the D2-FF Valvetop Switchbox for type of protection 'ec' against the requirements of IEC 60079-7:2017 Edition 5.1.
